All web design packages include a free domain name for 1 year, SSL security, and a responsive custom design. **eCommerce development includes** a custom store design and layout, product sorting, shipping and tax setup, and payment method setup.

Additional unique-to-you website features can be requested, quoted, and added based on the hourly rate.

MAINTENANCE

SERVICE RATE: \$20/HR

SERVICES INCLUDED

Updating text/graphics/media, blog post scheduling, blog graphics design, app & plugin maintenance and updates, adding new pages and products, updating product/tax and shipping info, redesigning store and page layouts, fixing website bugs and functionality issues, ensuring hosting and domain subscriptions are current, etc.

A monthly 15-minute phone call to discuss major tasks for the month.

PLEASE NOTE: Store and blog management are not included with maintenance. Your sales/customer information or product inventory/shipping will not be accessed for the purpose of management. Blog post content must be provided for scheduling.

HOW IT WORKS

You will be quoted a set amount of hours per month based on the average work you need to be completed monthly [10 minimum].

Once the quote is approved, service begins and an invoice will be sent 7 calendar days before the 1st of every month. The invoice is due 2 calendar days before the 1st of the month before any work can begin.

You will be provided a Maintenance Studio to track tasks/hours and to request additional tasks throughout the month. Any leftover hours will roll over to the next month. Continuous excess hours will result in an invoice adjustment to lower monthly hours.

REQUEST MAINTENANCE ONLY
